Friday April 19th 2024

Dear All,

Just a quick word to share the latest news about JDemetra+:

Release of Graphical user interface and Cruncher v 3.2.2 and Incubator v 2.1.0

In the **incubator** you will find plug-ins giving access to STL+, X12+ and STS, as well as extensions for high-frequency data.

More information:
- On our BLOG (link: https://jdemetra-universe-blog.netlify.app)
- and on GitHub (link: https://github.com/jdemetra)

Updates in the rjd3 ecosystem

You can check them on GitHub (link: https://github.com/rjdemetra)

JDemetra + documentation:

An updated version is available at:

https://jdemetra-new-documentation.netlify.app/

Main updates
- chapter on v 3.x news
- reviewed installation procedure
- refactored chapter on plug-ins, including incubator
- refactored chapter on benchmarking and temporal disaggregation
- and much more…

All the best,

Anna Smyk and Tanguy Barthelemy
